

WELCOME TO SILL OPTICS

INTRO

At Sill Optics, we're passionate about setting new standards in the field of photonic technologies, driven by our unwavering commitment to excellence and innovation. Renowned globally for our expertise in crafting bespoke product solutions, our 250 dedicated and dynamic employees stand ready to push boundaries. Since 1894, we create cutting-edge photonic solutions tailored to meet your specific needs. Your satisfaction remains at the core of our mission, driving us to continually exceed expectations.

CAPABILITIES

We are pioneers in the development and manufacturing of optical components.

Our services include:

- Optical Design
- Mechanical Design
- Cleanroom Fabrication
- Low Absorption Coatings
- Alignment Turning
- Prototyping
- High Precision Assembly
- Subsystem and Systems

SOLUTIONS

As a **leading supplier** of state-of-the-art lens systems and lenses, we specialize in **customized optics** for a wide range of applications.

Our product portfolio consists of three product areas:

- Laser Optics**
- Imaging Optics** and
- High Precision (A)spherical Lenses**

such as: f-theta lenses, beam expanders, trapped ion lenses, telecentric lenses, entocentric lenses and optical systems.

INNOVATION

Innovation is what drives us. Our state-of-the-art lens production makes us a unique partner for highly individualized one-off productions and test systems for series production. Our multiple award-winning product developments set international standards in

- Additive Manufacturing
- Laser Material Processing
- Metrology
- Medical Technology
- Semiconductor
- and many more
